

Title: Strava Fitness Analysis 18 Tableau dashboard images

NAME:MANNEPALLI ABHILASH

Here is an individual explanation for each of the 18 Tableau dashboard images you provided.

1. Daily Activity Dashboard (Daily Activity.jpeg)

"Daily Fitness Activity Dashboard-Fitbit Data"

Steps per Day

Calories Burned

Year of Activity Date
○ 2016

Year of Activity Date
■ 2016

Activity Intensity Breakdown

Distance Covered

This dashboard provides a high-level overview of daily fitness metrics:

- **"Steps per Day" (Line Chart):** Shows the trend of Total Steps over time (April to May 2016), highlighting daily fluctuations and a potential overall decline in engagement towards the end of the period.
- **"Calories Burned" (Scatter Plot):** Plots Calories against Total Steps, visualizing the relationship between activity and calorie expenditure. It can show if higher steps consistently lead to higher calorie burn and may reveal data anomalies (e.g., extremely high step counts).
- **"Activity Intensity Breakdown" (Bar Charts/Stacked Bars):** Illustrates the breakdown of minutes spent in Fairly Active, Lightly Active, Sedentary, and Very Active categories over Activity Date, helping to understand daily activity distribution and sedentary behavior.
- **"Distance Covered" (Line Chart):** Displays Total Distance covered over Activity Date, generally mirroring the steps trend due to high correlation.

2. Daily Calories Dashboard (Daily Calories.jpeg)

Despite the filename, this image appears to focus on *Daily Steps* related insights:

- **"Daily Steps Trend" (Line Chart):** Shows the overall trend of Step Total over Activity Day (April to May 2016), emphasizing daily variations.
- **"Steps Distribution" (Bar Chart/Histogram):** Illustrates the frequency distribution of Step Total values, indicating common ranges of steps taken and if many users fall below recommended counts.
- **"Average Steps per User" (Bar Chart):** Displays the Avg. Step Total for each unique user Id, crucial for understanding individual activity levels.

3. Daily Intensities Dashboard (Daily Intensities.jpeg)

This dashboard visualizes activity intensity over time:

- **"Activity Breakdown per Day" (Stacked Bar Charts):** Shows the daily accumulation of Fairly Active Minutes, Lightly Active Minutes, Sedentary Minutes, and Very Active Minutes over Activity Day, providing a temporal view of how activity intensity changes daily.
- **"Average Intensity per User" (Multiple Bar Charts):** Presents the average Sedentary Minut., Avg. Lightly Active Minut., Avg. Fairly Active Minutes, and Avg. Very Active Minutes for each Id, vital for segmenting users by typical intensity profiles.
- **"Total Active Minutes Comparison" (Line Chart):** Displays the Total Active Minutes (sum of very, fairly, lightly active) trend over Activity Day, visualizing overall daily activity levels.

4. Daily Steps Dashboard (Daily Steps.jpeg)

This image appears to be identical to "Daily Intensities.jpeg" focusing on activity intensity and user-specific intensity levels:

- **"Activity Breakdown per Day" (Stacked Bar Charts):** Shows the daily accumulation of Fairly Active Minutes, Lightly Active Minutes, Sedentary Minutes, and Very Active Minutes over Activity Day.
- **"Average Intensity per User" (Multiple Bar Charts):** Presents the average Sedentary Minut., Avg. Lightly Active Minut., Avg. Fairly Active Minutes, and Avg. Very Active Minutes for each Id.
- **"Total Active Minutes Comparison" (Line Chart):** Displays the Total Active Minutes trend over Activity Day.

5. Heartrate Second Dashboard (Heartrate Second.jpeg)

This dashboard visualizes granular heart rate data:

- **"Heart Rate Over Time" (Line Chart):** Shows Value (heart rate) over Time, often with individual lines for each user Id, allowing observation of individual heart rate trends and

variations.

- **"Avg Heart Rate by User" (Bar Chart):** Displays the Avg. Value (average heart rate) for each Id, helping to identify users with consistently higher or lower average heart rates.
- **"Heart Rate Distribution" (Histogram):** Shows the Count of Value (heart rate readings) distributed across different heart rate bins, indicating the most common heart rate ranges in the population.

6. Hourly Steps Dashboard (Hourly Steps.jpeg)

Despite the filename, this image appears to focus on *Hourly Intensity*:

- **"Intensity Over Time" (Line Chart):** Displays Total Intensity over Activity Hour, crucial

for understanding the hourly patterns of user intensity and identifying peak activity hours.

- **"Avg Intensity by Hour" (Bar Chart):** Shows Avg. Average Intensity by HourOnly (hour of day), providing a clear view of which hours users are, on average, most intense.
- **"User Intensity Levels" (Bar Chart):** Shows Total Intensity per Id, ordered from highest to lowest, helping identify the most (and least) intense users.

7. HourlyCalories Dashboard (HourlyCalories.jpeg)

This dashboard visualizes hourly calorie expenditure:

- **"Hourly Calories Burned" (Line Chart):** Shows Calories burned over Activity Hour, identifying daily cyclical patterns of calorie burning and peak expenditure hours.
- **"Avg Calories by Hour" (Bar Chart):** Displays Avg. Calories by HourOnly, summarizing

average calorie burn across the 24 hours of a day.

- **"Total Calories per User" (Bar Chart):** Shows Total Calories for each Id, sorted by value, aiding in understanding individual user's total calorie expenditure.

8. HourlyIntensities Dashboard (HourlyIntensities.jpeg)

This image appears to be identical to "HourlyCalories.jpeg", focusing on hourly calorie expenditure:

- **"Hourly Calories Burned" (Line Chart):** Shows Calories burned over Activity Hour.
- **"Avg Calories by Hour" (Bar Chart):** Displays Avg. Calories by HourOnly.
- **"Total Calories per User" (Bar Chart):** Shows Total Calories for each Id.

9. Minute Calories Narrow Dashboard (Minute Calories Narrow.jpeg)

This dashboard visualizes calorie data, likely aggregated at a minute or hourly level:

- **"Calories Over Time" (Line Chart):** Shows Calories over Activity Minute, providing a highly granular or aggregated view of calorie patterns.
- **"Total Calories per Hour" (Horizontal Bar Chart):** Aggregates Calories by Hour, showing the overall total calories burned across all users for each hour.
- **"Calories Burned by User" (Bar Chart):** Shows Calories per Id, highlighting users with higher or lower overall calorie burn.

10. Minute Calories Wide Dashboard (Minute Calories Wide.jpeg)

This dashboard provides more granular user-level calorie insights:

- **"Calories by User" (Bar Chart):** Shows Calories for each Id, emphasizing the distribution of calorie expenditure across the user base.
- **"Calories by User by Time and User" (Likely a detailed breakdown or trend for specific users):** The partially visible labels suggest a detailed view of calorie trends for individual users over time.
- **"Calories Over Minute of Day" (Likely a detailed time-series or heat map):** This could show average calories burned at each minute of the day, revealing very fine-grained patterns.

11. Minute steps Narrow Dashboard (Minute steps Narrow.jpeg)

Intensity over Time

Avg Intensity by Hour

Total Intensity by User

This dashboard offers granular insights into step data:

- **"Total steps by User" (Horizontal Bar Chart):** Displays the cumulative Total Steps for each unique Id, ranked from highest to lowest, highlighting the most active users.
- **"Steps vs ActiveMinute" (Line Chart/Scatter Plot with trends):** Shows Steps over Activity Minute, revealing patterns in step counts throughout the day or over a period.

12. Minute steps Wide Dashboard (Minute steps Wide.jpeg)

Total steps by User

Steps vs ActiveMinute

This dashboard provides a detailed look at step patterns across days and hours:

- **"Step by day/hour" (Bar Chart):** Likely aggregates Hourly Steps by Hour of Day and Day of Week, identifying peak step activity times during specific days.
- **"Daily Step Pattern" (Stacked Bar Chart):** Visualizes the total Hourly Steps categorized by Day of Week and colored by Hour of Day, showing the overall contribution of each hour and day to total steps.
- **"Step Trends over Time" (Line Chart):** Displays Hourly Steps over Activity Hour, a time-series view showing fluctuations and trends in hourly step counts over the entire

data collection period.

- **"Activity Distribution" (Bar Chart):** Likely shows the total sum of Hourly Steps categorized by Activity Type (e.g., "Vigorous Activity").

13. Minute Intensities Narrow Dashboard (Minute Intensities Narrow.jpeg)

Intensity over Time

Avg Intensity by Hour

Total Intensity by User

This dashboard focuses on minute-level intensity:

- **"Intensity over Time" (Line Chart):** Shows Intensity over Activity Minute, helping identify moments of high or low intensity throughout the day or period.
- **"Avg Intensity by Hour" (Scatter Plot/Bar Chart):** Displays Avg. Intensity by Hour of Day, aiming to show which hours typically have higher average intensity.
- **"Total Intensity by User" (Bar Chart):** Shows Total Intensity for each Id, helping identify the most (and least) intense users based on overall intensity accumulation.

14. Minute Intensities Wide Dashboard (Minute Intensities Wide.jpeg)

This dashboard provides alternative views of intensity data:

- **"Avg Intensity per Hour" (Horizontal Bar Chart):** Displays average intensity for each HourNumber, providing a clear, quantitative comparison of average intensity across the 24 hours.
- **"Total Intensity per User" (Bar Chart):** Shows Total Intensity accumulated by each Id, sorted in descending order, for a direct comparison of user engagement in terms of total intensity.
- **"Users vs Hour" (Likely a heat map or scatter plot):** Visualizes Id versus Hour, potentially showing when individual users are most active or intense.

15. Minute Sleep Dashboard (Minute Sleep.jpeg)

This dashboard delves into sleep patterns:

- **"Sleep duration per Session" (Bar Chart):** Shows the Value (likely minutes or hours of sleep) for individual Log Ids, visualizing the duration of each recorded sleep session.
- **"Total Sleep per User" (Bar Chart):** Displays the Total Sleep (e.g., Total Minutes Asleep) for each Id, ordered by amount, helping identify users with consistently more or less sleep.
- **"Daily Sleep Trend" (Line Chart):** Shows Value (sleep duration) over Date, allowing observation of daily fluctuations and overall trends in sleep patterns.

16. MinuteMETs Narrow Dashboard (MinuteMETs Narrow.jpeg)

This dashboard visualizes Metabolic Equivalents (METs) data:

- **"Simulated Time Series" (Scatter Plot):** Shows METs over an Index, which could represent an aggregate or an outlier, or minute-by-minute METs data.
- **"Aggregated View" (Bar Chart):** Displays METs aggregated by Year of Acti... (likely Activity Year), giving a broad overview of METs accumulation and confirming the data year.

17. Weight Log info Dashboard (Weight Log info.jpeg)

Weight over Time

Avg Weight by Weekday

This dashboard visualizes weight tracking information:

- **"Weight over Time" (Bar Chart):** Shows Weight Kg over Date, allowing tracking of individual weight fluctuations over the data collection period.
- **"Avg Weight by Weekday" (Bar Chart):** Displays Avg. Weight Kg for each Weekday, potentially revealing if recorded weights vary consistently by day of the week.

18. Sleepday Dashboard (Sleepday.jpeg)

Daily Sleep Duration

Weekly Sleep Patterns

Sleep Efficiency
0.88 29.81

Sleep Records Count

Sleep Efficiency

User Comparison

This dashboard provides a more comprehensive view of sleep data:

- **"Daily Sleep Duration" (Line Chart):** Shows Hours Asleep over Sleep Day, highlighting consistency in sleep duration each night.
- **"Weekly Sleep Patterns" (Scatter Plot):** Plots Hours Asleep for each Day of Week, showing how sleep habits might differ throughout the week.
- **"Sleep Efficiency" (Line Chart):** Shows Sleep Efficiency over Sleep Day, indicating the proportion of time spent actually asleep while in bed, offering insights into sleep quality.
- **"User Comparison" (Bar Chart):** Displays Hours Asleep for each Id, comparing sleep amounts across different users.
- **"Sleep Records Count" (Bar Chart):** Shows Total Sleep Records for each Id, indicating data completeness per user.

conclusion:

The 18 Tableau dashboards provide a comprehensive visual overview of fitness tracker usage, revealing key insights into user activity patterns, calorie expenditure, heart rate trends, and sleep behaviors. They highlight fluctuations in daily and hourly engagement, the prevalence of sedentary periods, and varying sleep quality among users. These visualizations offer actionable intelligence, enabling Bellabeat to tailor marketing campaigns, encourage consistent movement through micro-interventions, and emphasize holistic wellness, ultimately empowering users and driving strategic growth.
